

Padma is a sweet little Lab/BostonTerrier Blend puppy looking for her furever home. She is about 4 months old and weighs about 12 lbs. Padma was dumped at a high kill shelter in Texas by her former owners. Her time was up and because she was just another puppy dumped at a shelter, she was going to be euthanized. Padma was scared and very confused, her family, her bed and her toys were replaced with strange shelter workers, a towel and steel bars. Her surroundings were no longer warm and cozy, they were cold and scary. Low Riders couldn't say no to Padma, we rescue to give dogs a new life, and if any dog needed a new life it is Padma. She is thriving in her foster home, she is no longer the scared dog in the shelter, she is full of life and very thankful to be out of the shelter. Padma is full of life and loves to play and sleep (just what puppies should be able to do). She is sweet and very cuddly and loves other dogs. She will bring years of love and laughs to any family that will open their hearts to her. If you would like to meet Padma please fill out an application at

www.lowridersofthewest.org

Padma's adoption fee is \$300.00 - she is up to date on all her puppy vaccinations and chipped.
